

Microland is “Making digital happen” – allowing technology to do more and intrude less. Our solutions for Cloud and Datacenter, Networks, Digital Workplace, Cybersecurity, and Industrial IoT make it easier for enterprises to adopt NextGen Digital infrastructure. Microlanders throughout the world ensure this embrace of digital brilliance is predictable, reliable, and stable. Incorporated in 1989 and headquartered in Bengaluru, India, Microland has more than 4,500 digital specialists across offices and delivery centers in Asia, Australia, Europe, Middle East, and North America.

In the words of **Peter Bendor-Samuel, CEO Everest Group**,  
**“When I think of high-performing infrastructure that is silent running – I think of Microland”.**

## Clients Speak

Microland has been our partner to accelerate our digital transformation journey for the past few years and I am happy to see them expand their business and operations footprint in UK and Continental Europe. Combining the strengths of Microland with that of Serco's expectation of rapid transformation always results in formidable capabilities with an intimate understanding of our needs and opportunities. This, and the cultural fit between our two organisations, is the foundation of our partnership.

**John Lockett**  
 CIO, Serco Group Plc

Microland has been a valued partner to us over the years. Their IT expertise and technology capabilities is pivotal in our IT Strategy, which in turn delivers greater value to our clients. With increasing technology disruption and cyber security considerations in the legal industry, Clifford Chance is leading with a Digital strategy at the heart of our IT operations. And I am certain Microland will play a significant role in accelerating this journey.

**Paul Greenwood**  
 CIO, Clifford Chance

## Managing

**900k+**  
Mailboxes

**207k+**  
Network  
devices

**250k+**  
Servers

**450k+**  
Mobility  
users

## Digital Services

**Cloud Services:** Deliver complete control and adaptability to the private/hybrid data centres, speedy configuration, and faster roll-out of innovative services. A key area of specialisation includes application migration to cloud including mission critical workloads like SAP

**Modern Workplace Services:** Enable secure workplaces via VDI, desktop-as-a-service, unified endpoint management, collaboration tools roll-out and adoption including M365/O365, thus enhancing user experience management and workplace security

**Network Services:** Execute seamlessly and speedily digital processes by designing, deploying and scaling network infrastructure. These include VPN, Cloud based WLAN, LAN and WAN rollout & management including Software defined LAN & WAN

**Smart Operations Center:** 24x7 Operations Center monitoring of all digital touch-points with a focus on expedited response and resolution of cyber threats in an expanding digital footprint environment
