

Microland Accelerates Adoption And Build Out of Cloud Computing Services in India With Integrated Offering Based on Citrix CloudPlatform

BANGALORE, July 24, 2012 /PRNewswire/ --

Microland is Citrix's First Cloud Advisor Partner in India

Microland Limited, a leading IT infrastructure services provider, will offer large and medium size businesses in India a set of integrated solutions for cloud design, deployment and management. Addressing the fast growing cloud services market estimated to grow to USD 3.5 billion in India by 2015, according to a report by Zinnov, Microland will help businesses leverage cloud-based solutions to transform their businesses.

Microland will provide end-to-end cloud lifecycle services, from consulting, design and architecture to delivery, deployment, implementation, monitoring and management. This will enable companies in evaluating cost-effective and robust open source options for cloud deployment to gain new business capabilities, increased agility and better manageability.

Microland will deliver services based on advanced technology in the following areas:

- Citrix CloudPlatform, powered by Apache CloudStack, is an open source cloud computing platform that provides the technology for evolving virtualized data center resources into elastic cloud computing environments. This platform enables organizations to build public, private and hybrid Infrastructure-as-a-Service (IaaS) clouds. Users can self-provision compute, network and storage resources through a self-service web portal while administrators are able to manage large numbers of virtualized resources through open APIs. CloudPlatform is hypervisor-agnostic, providing support for XenServer, ESX, vSphere, OVM and KVM.
- Citrix CloudPortal™ Business Manager is a comprehensive business operations suite that works in conjunction with Infrastructure-as-a-Service clouds running on Citrix CloudPlatform, enabling providers to quickly and easily transform their clouds into businesses. Account management, pricing and billing, customer management and reporting capabilities accelerate time-to-market and on-boarding processes. Customers can use CloudPortal to manage their accounts and control their IaaS services.

Microland is the first Cloud Advisor Partner for Citrix in India and will leverage its capabilities and expertise in delivering services integration and co-creation of the cloud with its customers.

Vaibhav Tewari, Vice President & Business Head - Cloud Services, Microland, said, "We are delighted to be a Citrix Cloud Advisor. Microland is already working with large enterprises on the deployment and migration to private cloud across verticals such as banking, financial services, healthcare and government. With Citrix, we look forward to enhancing our cloud offering and extending them to the service provider segment as well."

Mark Micallef, Senior Director, Cloud Platforms, Citrix Asia Pacific, said, "In India, cloud computing is experiencing explosive growth because of the economics and availability of services that have aligned well with the growth and innovation of new business in the region. Our ability to take advantage of this growth has been strengthened through this announcement with Microland, which allows us to work with customers of all shapes and sizes to build extensible, highly scalable, multi-tenanted clouds. We can leverage Microland's 23 years of expertise and experience in service integration and IT infrastructure management services to deliver on our vision for cloud computing in India."
