

MICROSOFT PRIVATE CLOUD SERVICES

TRANSFORM YOUR DATACENTER ENVIRONMENT WITH MICROSOFT SYSTEM CENTER

Realizing your datacenter transformation goals requires simplifying how you provision, manage, and operate your environment. Adoption of Microsoft System Center can boost your enterprise's flexibility and minimize

infrastructure investments. Implementing a robust cloud using System center and integrating it with other technologies present in datacenter and public cloud requires solid expertise.

HOW WE HELP

Our Private Cloud Services (see Figure 1) enable you to leverage existing investments, apply cloud capabilities, and

simplify management of your cloud environment by leveraging Microsoft System Center suite of products.

Figure 1: Microland's Microsoft System Center Integrated Service Offerings

Our systematic service methodology (see Figure 2) covers implementation, integration, and customization

of the System Center suite of products to fit organizational needs.

WHAT YOU CAN EXPECT

We simplify cloud management for enterprises to deliver the following outcomes:

- Seamless implementation and integration of Microsoft System Center suite of products
- Maximized resource efficiency through efficient

resource tracking and reporting

- Self-service model to manage infrastructure allocation to applications and services
- Minimized costs and application service interruptions through automation of IT operations

WHAT SETS US APART

Our Microsoft System Center integrated services give you the best possible advantages of both – your existing investments and the features of Microsoft private cloud. Our differentiators include:

The Microsoft Advantage

- As Microsoft's 'Best Infrastructure Services Partner' for eighth years, we are strongly positioned to help you leverage Microsoft technologies for maximum benefits.

Customized Environment

- Leveraging pre-defined assets such as Now2Cloud and SDDC framework, coupled with our vast expertise, we customize your hybrid cloud environment to address specific needs.

Custom Workflows

- We automate provisioning of resources in the cloud and create end-to-end change management systems for users.
