

AI-Powered Messaging, Collaboration and Meeting Room Services

Enabling secure, AI-assisted collaboration across
chat, meetings, mail, content and meeting spaces

Modern workplaces need more than email and chat. They need a well-governed collaboration environment that connects people, content, meetings, and rooms securely across a distributed workforce.

Microland helps enterprises modernise and run their Microsoft 365 collaboration estate with a clear focus on Copilot readiness, tenant governance, license optimisation, workload migration, managed operations, and continuous service improvement. We support core collaboration workloads across Exchange, Teams, SharePoint, OneDrive, and meeting room environments.

What Microland Offers

**M365 Build,
Consolidation and
Migration Services**

**M365 Managed
Operations, Governance
and Lifecycle Services**

**Change, Adoption
and Copilot
Enablement Services**

**Collaboration Space,
Meeting Room and
Conference Room
Support Services**

What Microland Delivers

Consistent collaboration experiences across devices,
locations and workstyles

Better tenant governance with automated policy monitoring and control

Lower cost and better value through license optimisation and workload rationalisation

More resilient collaboration with stronger security, compliance and service continuity

AI-enabled collaboration with practical governance, security and measurable user value

Why Microland

Proprietary 4A framework to simplify governance, adoption, assurance and administration across the M365 tenant

Single-interface platform for automated migration, deployment, management and reporting across Microsoft 365 workloads

OCM-led adoption approach that helps users embrace new ways of working, including AI-assisted collaboration

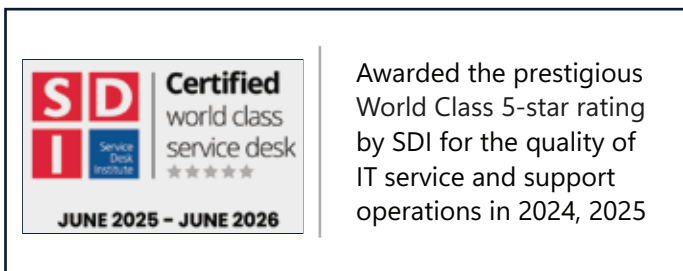

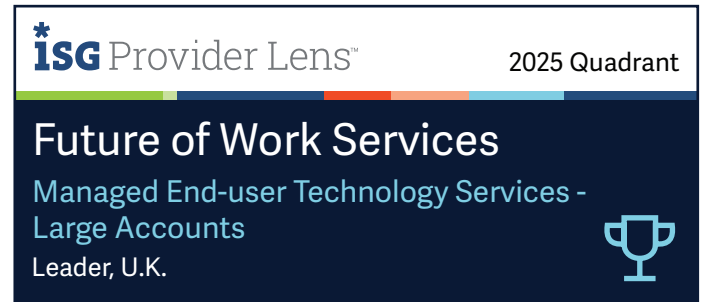

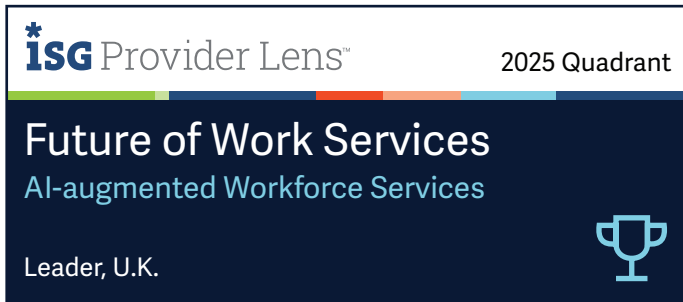

Specialised support for collaboration spaces, Teams Rooms and conference room experiences, covering room readiness, device lifecycle, meeting quality and user support

Success Stories

Trusted by a Fortune 20 enterprise for over two decades to manage large-scale messaging services, modernise Exchange environments and support the move to cloud-based Microsoft 365

Built a Migration-as-a-Service factory to deliver high-scale Microsoft 365 migrations for 2M+ users, including regulated customers, with sustained delivery quality over multiple years

Recognized by Global Analysts

About intelli^{geni}

intelli^{geni} is Microland's proprietary AI-First platform, conceived and engineered in-house to deliver truly autonomous IT operations. Built on a dynamic Knowledge Graph and powered by Agentic AI, intelli^{geni} transforms enterprise infrastructure into a self-healing, adaptive ecosystem—ensuring always-on performance, faster incident resolution, and continuous compliance. Available in NetOps, CloudOps, Workplace, and CyberOps variants, the platform integrates seamlessly with existing environments, enabling organizations to align IT with business goals, boost productivity, and accelerate innovation. With intelli^{geni}, Microland leads the industry's shift from automated to truly autonomous operations, future-proofing digital enterprises worldwide.

About Microland

Microland is a leading AI-first, platform-led, technology infrastructure services company. We have enabled enterprises to build intelligent, resilient, and future-ready operations and are a trusted partner to global enterprises. We bring over 35 years of expertise in digital networks, cloud, data centers, workplaces, and cybersecurity, and combine it with our commitment to customer centricity, delivery excellence, and continuous innovation. Our operations, currently in more than 100 countries, are supported by a strong global delivery model and our AIOps platform, intelli^{geni}, powered by Agentic AI, which is shaping the future of autonomous technology operations across enterprises.
